

ONESTREAM XF CLOUD

POWERED BY
Microsoft Azure

99.95%
Uptime Guaranteed

Move to and from
on-premise and cloud

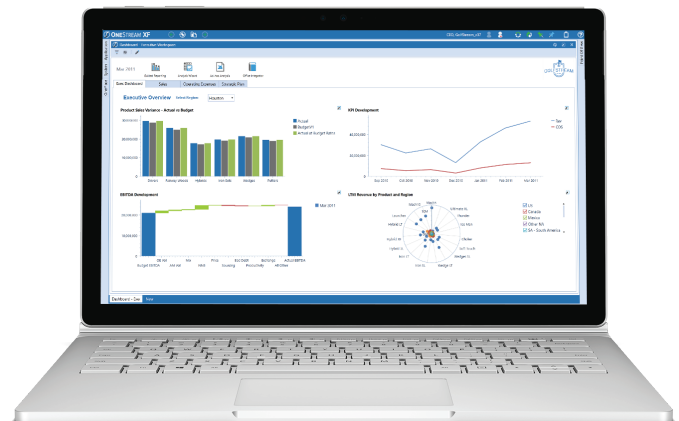

Guaranteed resources
and performance on
demand

Organizations looking to replace spreadsheet or legacy corporate performance management (CPM) applications with a modern solution should be provided the choice of deploying the new solution in the way that best suits their requirements. Whether it's the cloud, on-premise, or a combination of both – Finance and IT departments should be offered flexibility, with the assurance that their critical corporate data will be secure and the system will provide the availability and performance they require.

OneStream XF SmartCPM™ Platform

At OneStream, we believe your success is the only option. We started over to invent a SmartCPM platform that is easily extended with any of our XF MarketPlace solutions. OneStream XF Cloud allows you to deploy in the Cloud on day one or move to the Cloud when you are ready. With verifiable 100% customer success and reference ability, OneStream XF is truly game changing.

3x

Redundant to the minute for 35 days

Resources
“flex”
to meet system demands

Upgrade
on your time frame in less than 2 hours

100%
CUSTOMER SUCCESS

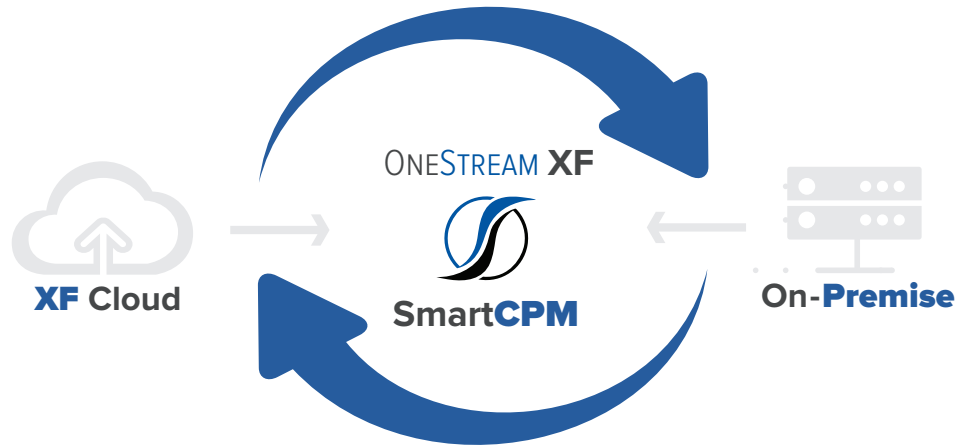

Built for Success

OneStream’s Cloud platform gives customers the power to easily scale up and out and feel confident in the security of their financial data. Unlike competing EPM cloud solutions, XF Cloud provides maximum privacy and can be customized for an organization’s precise needs. Built for the cloud and the ability to resize and modify the environment within minutes, performance is never an issue. Using Microsoft’s seamless technology stack, everything from configuration, backups and upgrades are infinitely easier and less expensive than traditional on-premise or hosted deployments.

ONE SmartCPM™ Solution

Simplify IT maintenance and lower the total cost of deployment with XF Cloud, a SMART platform solution that leverages the **Microsoft Azure** platform that easily supports multiple environments. With on demand limitless resources providing uninterrupted workflow and complete data privacy, you get the right Corporate Performance Management solution for your organization.

Flexible Deployment Options

Architected from day one to take full advantage of the cloud. OneStream XF offers choice when it comes to deployment options. Deploy either on-premise or in the cloud with XF Cloud. By leveraging the Microsoft Azure® Cloud Platform, you get the right Corporate Performance Management deployment for your organization. OneStream lets you have it your way! Since OneStream was built for the cloud from the ground up, it’s only a matter of hours to move from On-Premise to the Cloud or vice-versa. You can not only have it your way but have it your way any day!

SCALABLE

- ✓ 64-bit, in-memory application
- ✓ Zero latency memory synchronization
- ✓ Stateless server technology
- ✓ Multicore optimized
- ✓ Ability to scale out and up
- ✓ Resize environment in minutes

RELIABLE

- ✓ OneStream certified environments
- ✓ 99.95% Uptime
- ✓ Complete server redundancy
- ✓ Easily support multiple environments
- ✓ Built for virtualization

POWERED BY
Microsoft Azure

Advanced Data Security

OneStream provides a secure platform for your most sacred financial data. OneStream's robust cloud service complies with the most stringent industry regulations. Our flexible security model provides complete control over any intersection of data or user access, with unparalleled audit capabilities.

Pay For What You Use

OneStream strikes the balance between performance and scalability and cost. As you add additional solutions or grow through acquisition, the Microsoft Azure resources can be rapidly scaled to meet the demands of the new solutions or additional users. Additionally, you can reduce your consumption and ensure the most economical infrastructure. This dial up or down capability ensures the correct balance between cost and performance as you only pay for what you use.

Automatic Redundancy

3x Redundant data center reduces downtime and the risk of interruption to your financial processes, critical to running your business. OneStream provides backups to the minute for 35 days

Cloud Services

OneStream offers full Cloud Services to take care of your Azure Cloud requirements and OneStream application to reduce the IT burden of maintaining infrastructure and application availability. As a supplement to IT staff, OneStream takes on the care and feeding of the application environment. Upgrades are done by us and on a time designated by you and not driven by someone else's weekend schedule.

Data Where You Need It

Microsoft Azure maintains a global presence to help customers and partners meet their goal of providing applications close to their user base. Storage of data can be restricted to a single geography, region or country and provide complete data sovereignty.

OneStream XF was architected from day one to optimize the cloud. OneStream XF Cloud is pre-configured, optimized & monitored for CPM performance without compromise.

“

OneStream in the cloud has been incredibly adaptable. We have people around the world accessing the system and its always available and always at peak performance. In addition, OneStream XF Cloud has eliminated the need for IT to maintain infrastructure and databases, which saves time and money.”
