THE POWER OF EPM

Enterprise Performance Management (EPM) tools can be exceptionally powerful to businesses that wish to leverage data on a timely basis to drive business excellence. An EPM solution sits on top of different systems; be they multiple ERPs, or a combination of business systems. EPMs combine data from multiple sources, multiple legal entities, multiple global business units, and multiple currencies to quickly provide management consistent reporting and analysis across your organization. Aside from Management Reporting, Scorecards, and Analysis, an EPM is often used to generate SEC Reporting, Tax Reporting, and Lender Reporting... PLUS it can be leveraged to drive Intelligent Budgeting and Forecasting across your organization.

EPM — Driving Business Excellence (see chart) shows the flow of data from your SOURCE SYSTEMS through ETL (Extract, Transform, Load) TOOL and eventually generating REPORTING & ANALYSIS for both internal and external consumption.

Excel Global Partners (EGP) has extensive experience across numerous leading EPM tools. Leveraging this knowledge, along with our real-world experience and business acumen, we are able to guide you through selection & evaluation to implementation & design to training & roll-out of an EPM solution that works for you! Beyond Go Live, EGP can provide out-sourced administration and maintenance that fits your organization's needs.
