EGP + EPM = EXCEPTIONAL SOLUTION!

Implementation: Excel Global Partners (EGP) is a boutique consulting firm that is prepared to support your organization with custom-tailored solutions. These solutions fit the precise needs of your business and drive performance at every stage of the growth cycle. From evaluating your existing systems to understanding where your business is heading, EGP has a track record of delivering outcomes that are a best fit not only for today, but for tomorrow. With a winning combination of sophisticated technical knowledge of today's leading Enterprise Performance Management (EPM) solutions to business knowledge, end-user experience, and corporate acumen, EGP will guide you through a successful design and delivery. Implementation strategies involve several intricate stages, requiring a sophisticated project management team that is experienced with the necessary skills to lead a successful conversion. EGP consultants will deliver solutions to your company - we will partner with your management team to make solid decisions and deliver exceptional technical expertise to make the process a smooth and successful transition.

On-Demand Database Administration: EGP is so confident in its system implementation solutions, that we offer to all of our clients an On-Demand service for long-term system administration as a value co-creator.

This solution is for companies that do not wish to invest in the overhead of a full-time system administrator. This service is a great fit for our customers who will only need the expertise of an administrator when there are significant changes to their system; thereby saving thousands of dollars in payroll, continuing education, and turnover costs. We are always available when you need us — Financial System Administration On-Demand!

“EGP not only completes the tasks assigned to them, but also provides value-added recommendations for process improvements based upon their vast portfolio of experience.”

- Fortune 500 Client

Value-Recognized Performance Evaluation and Tuning: EGP recommends performance and evaluation tuning to clients who already are utilizing an EPM solution. From evaluating the system operations to streamlining processes to enhancing the reporting capabilities for today's needs, we will save you time and money, improve your system performance, and take your reporting and analytical capabilities to the next level.

Customized Solutions: At EGP we listen our clients. We supplement this approach with our technical expertise, knowledge of EPM trends, best practices, and real-world experience in businesses around the world. The end result is a customized solution that fits the client's resources, needs, and long-term demands. Our experience in business further allows us to align end-user requirements with technical resources - we are skilled at bridging the gap between your Finance, Accounting, and IT organizations.

Top Notch Training: EGP offers customized training on your system to your employees, thereby creating sustainability and value for your organization. Our skilled consultants have delivered training at many levels on a wide array of products. We can develop and/or deliver - you decide!
